Juno Costa Kim - Projeto de Software - Prof. Orlando - IFSC 2022.2

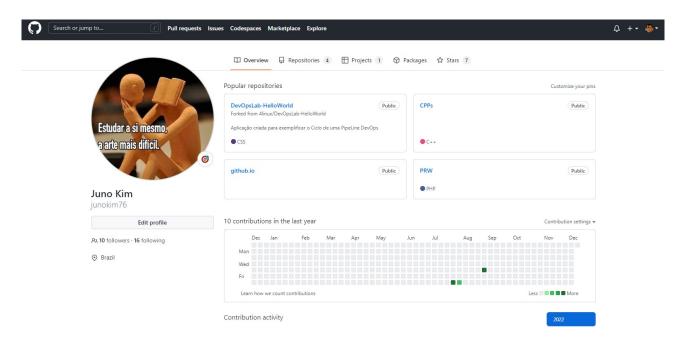

Tarefa GIT

1. Instale o git na sua máquina(verifique seu sistema operacional e sua configuração de S.O), e crie um diretório(pasta) por comando ou pelo mouse(Mostrar print);

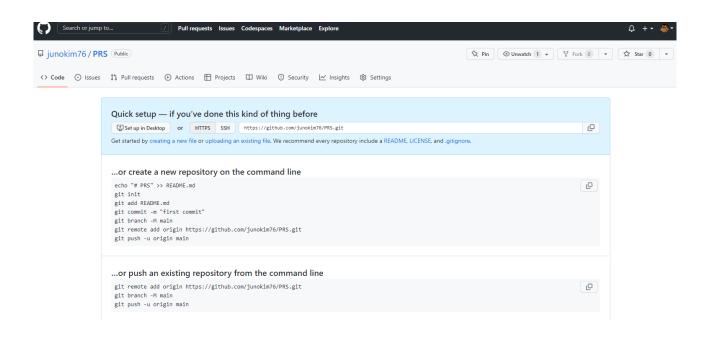

2. Se não tiver conta no github, crie uma; link: https://github.com/ (Mostrar print da conta)

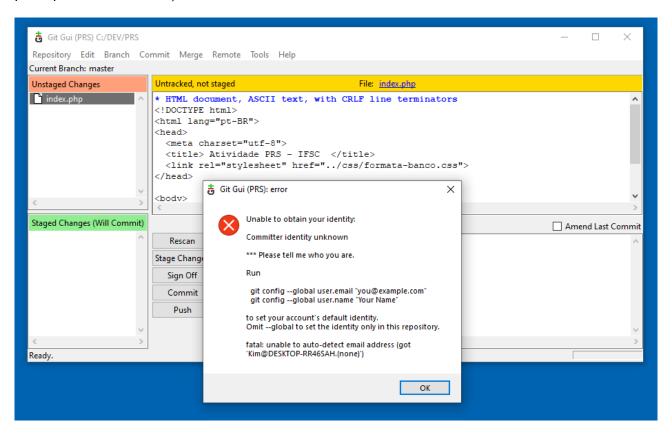

endereço da conta: https://github.com/junokim76

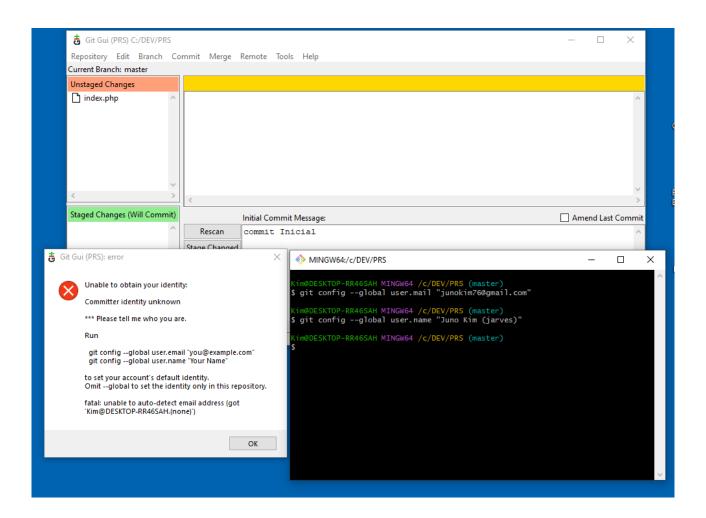

3. Crie um arquivo de texto dentro do diretório, e insira qualquer texto, de qualquer tamanho a sua escolha; (Mostrar print)

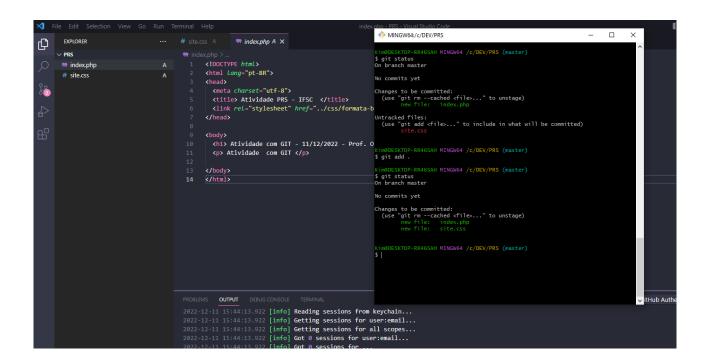

4. Crie um diretório no seu github; (Mostrar print)

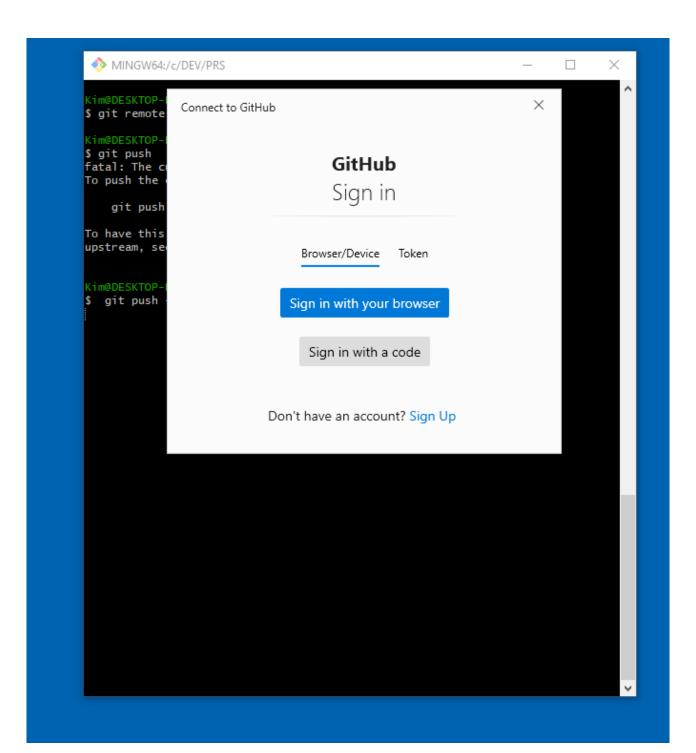

5. De acordo com as instruções de comandos do vídeo, envie este arquivo para sua conta no github; (Mostrar print do arquivo enviado no git hub, e o print dos comandos para que isso ocorresse)

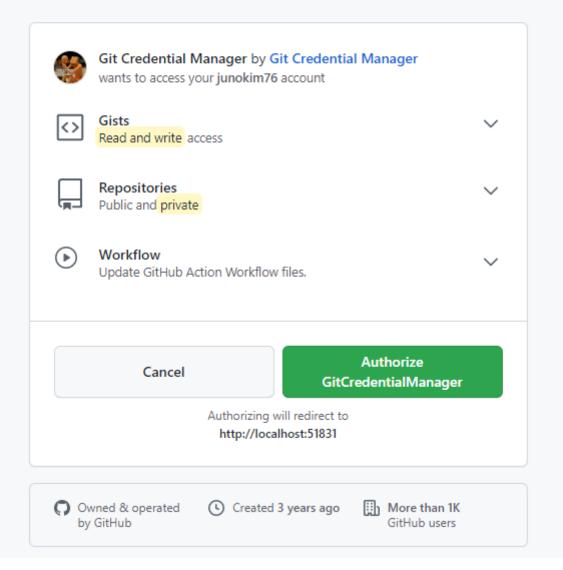

```
MINGW64:/c/DEV/PRS
                                                                           ×
Kim@DESKTOP-RR46SAH MINGW64 /c/DEV/PRS (master)
$ git status
On branch master
No commits yet
Untracked files:
  (use "git add <file>..." to include in what will be committed)
nothing added to commit but untracked files present (use "git add" to track)
Kim@DESKTOP-RR46SAH MINGW64 /c/DEV/PRS (master)
$ git add .
Kim@DESKTOP-RR46SAH MINGW64 /c/DEV/PRS (master)
$ git status
On branch master
No commits yet
Changes to be committed:
  (use "git rm --cached <file>..." to unstage)
Kim@DESKTOP-RR46SAH MINGW64 /c/DEV/PRS (master)
$ git commit -m "Commit Inicial"
Author identity unknown
*** Please tell me who you are.
Run
 git config --global user.email "you@example.com"
git config --global user.name "Your Name"
to set your account's default identity.
Omit --global to set the identity only in this repository.
fatal: unable to auto-detect email address (got 'Kim@DESKTOP-RR46SAH.(none)')
Kim@DESKTOP-RR46SAH MINGW64 /c/DEV/PRS (master)
```

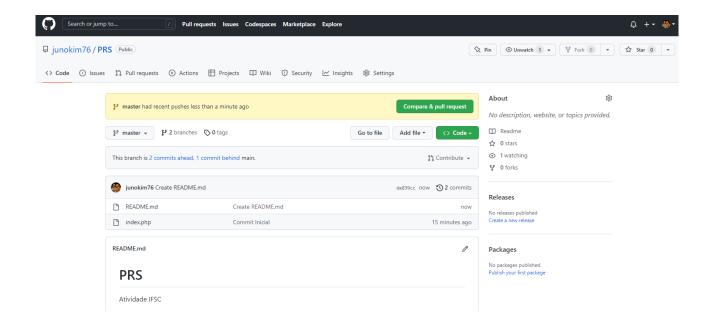

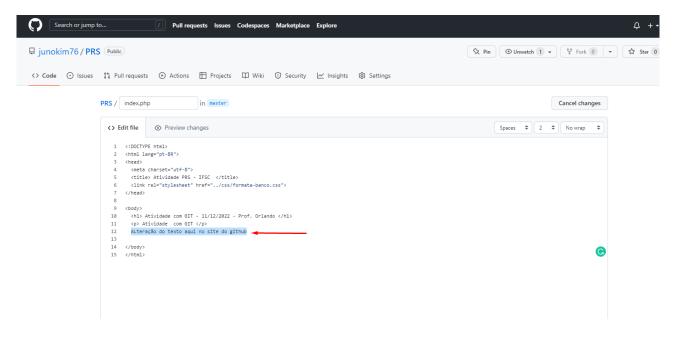

Authorize Git Credential Manager

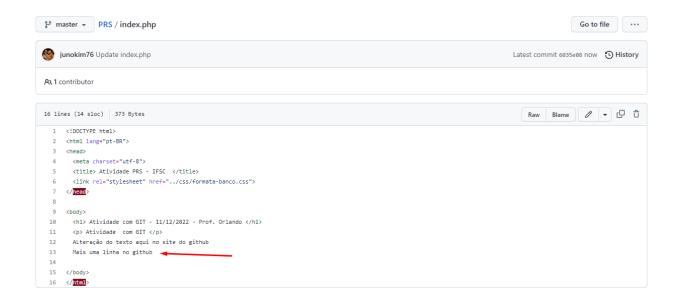

```
MINGW64:/c/DEV/PRS
                                                                          \times
Kim@DESKTOP-RR46SAH MINGW64 /c/DEV/PRS (master)
$ git remote add origin https://github.com/junokim76/PRS
Kim@DESKTOP-RR46SAH MINGW64 /c/DEV/PRS (master)
$ git push
fatal: The current branch master has no upstream branch.
To push the current branch and set the remote as upstream, use
    git push --set-upstream origin master
To have this happen automatically for branches without a tracking
upstream, see 'push.autoSetupRemote' in 'git help config'.
Kim@DESKTOP-RR46SAH MINGW64 /c/DEV/PRS (master)
$ git push --set-upstream origin master

7. Use uma branch, pelo menos, quando fizer alterações.

Criando uma nova branch

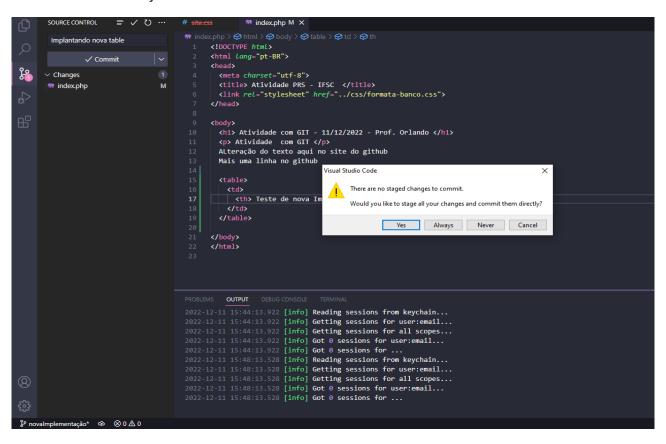

Mensagem no commit

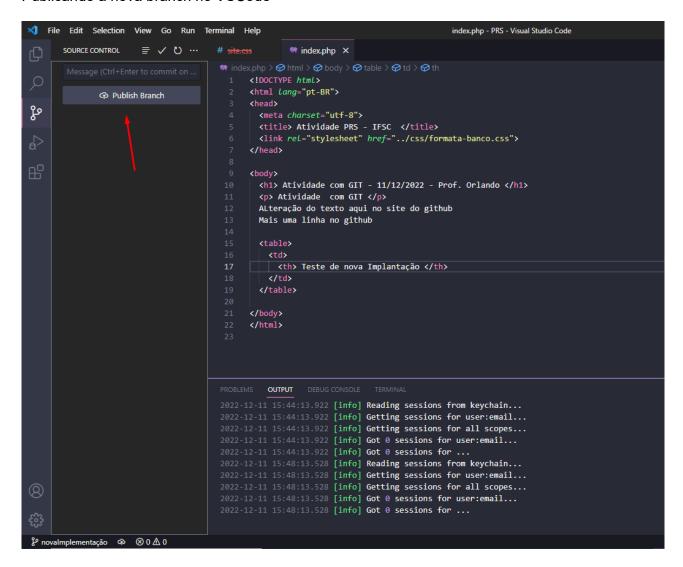

Confirmando alterações na branch

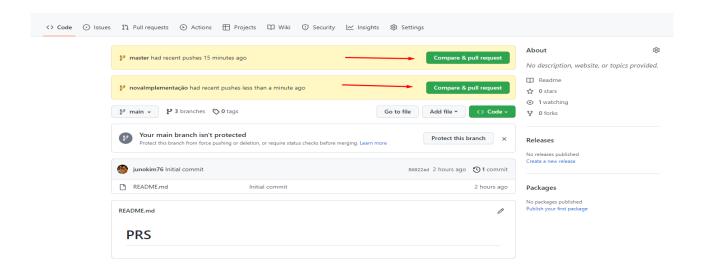

8. Reenvie ao github a nova versão; (Mostrar comandos e print)

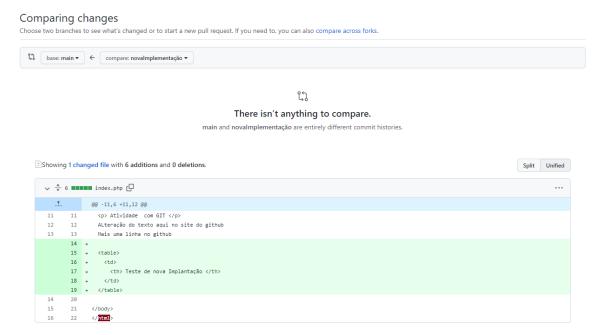

Publicando a nova branch no VSCode

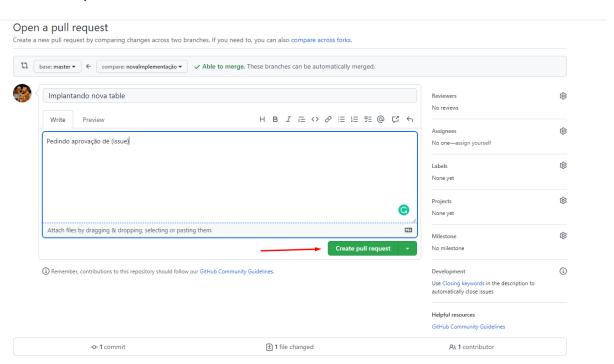

Agora faremos os "Pull Requests"

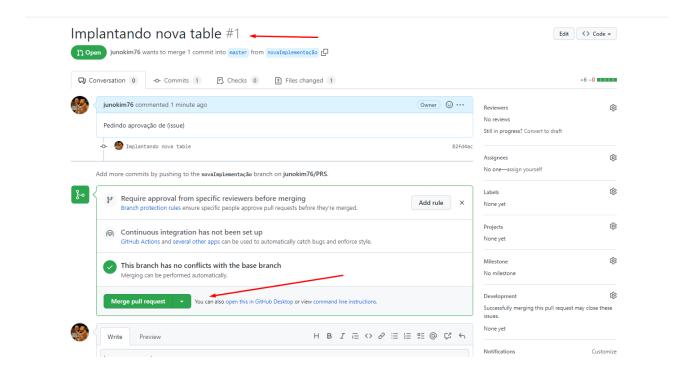

Na branch master

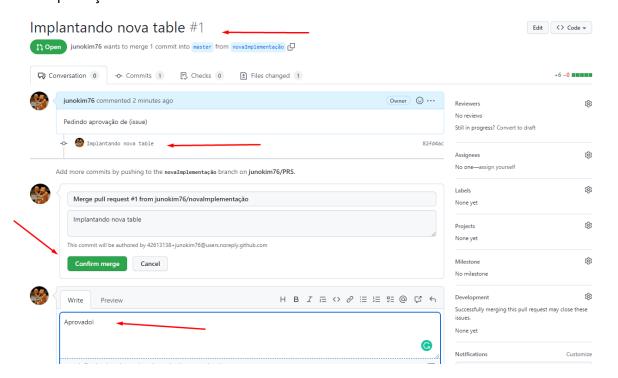

Criando o Pull Request no Github

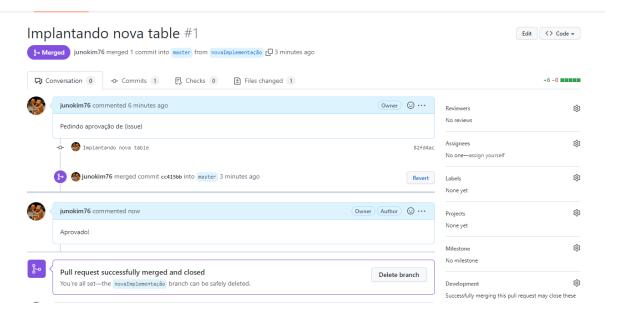

O "Pull Request" vira um pedido de merge que precisa ser analisado

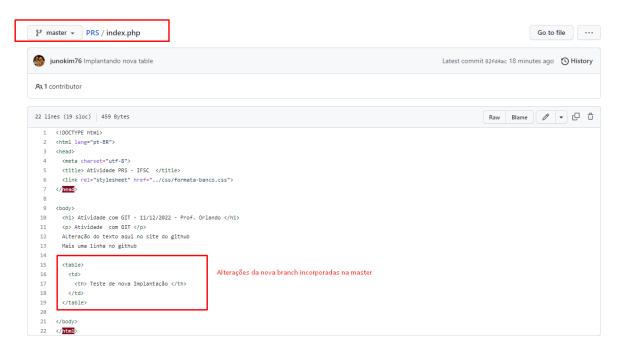

Fazendo a aprovação

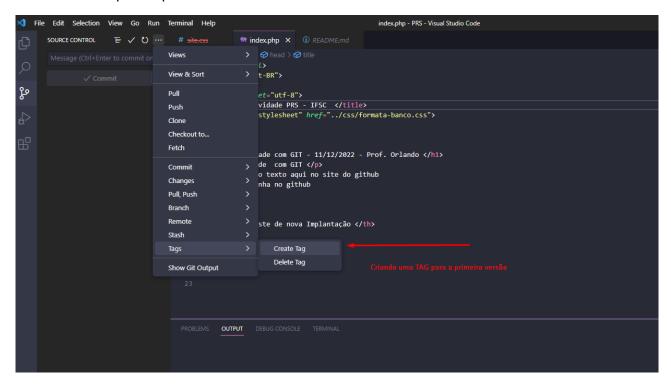

Merge pronta!

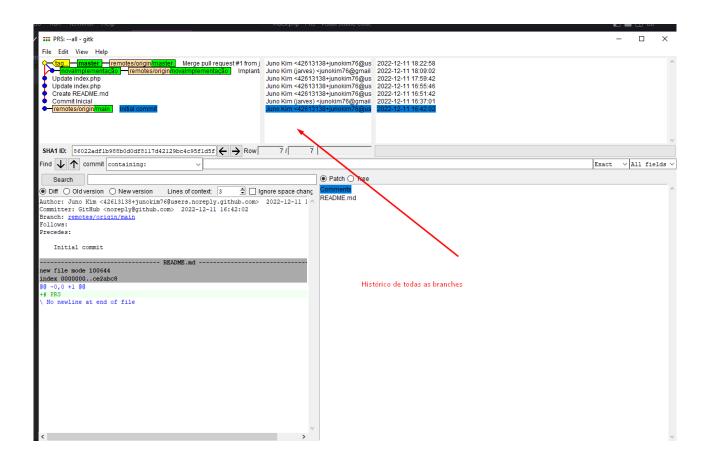

E agora as alterações foram incorporadas na branch master

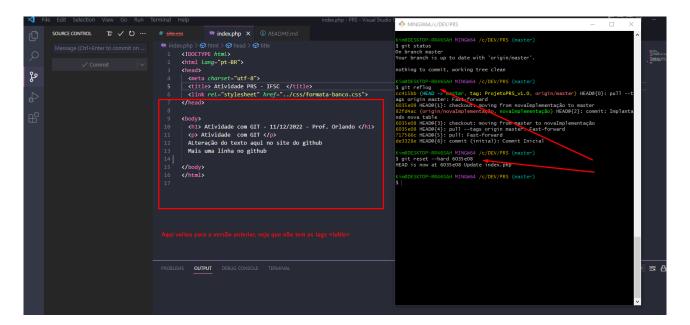

Criando a TAG para a primeira versão

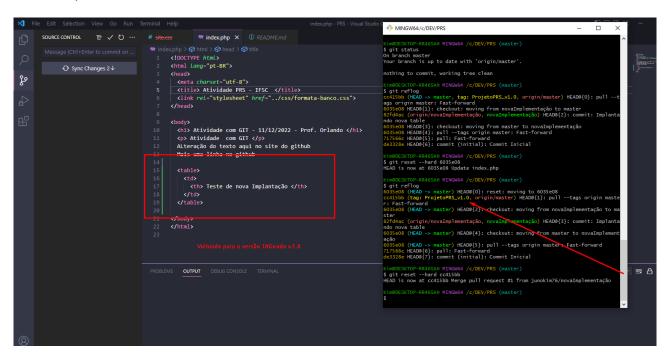

Mostrando o histórico das branches

10. Execute o comando para voltar a versão anterior; (Mostrar print do comando e do conteúdo retornado);

Voltando para a versão TAGeada v.1.0
